

# Supporting the development of Christian leaders

From New Zealand we support the training of Christian leaders within their own communities, cultures and nations. We focus on Asia-Pacific, where the Church is growing very rapidly in spite of its financial poverty & (often) persecution.

Contextual training & development enables the next generation of leaders to step forward both within the Church and society. In turn they enable their churches to impact their communities for Christ.

## LeaDev-Langham

Emerging leaders are given practical training & skills to lead the work of God in their local communities.

Senior leaders are sponsored for post-graduate studies, taking their influence to a regional level.

Trainee leaders are supplied with a range of learning resources to deepen their understanding of the Scriptures, & to teach others.

Ministry partners receive relief aid if their area is hit with a catastrophic disaster, enabling them to bring practical assistance to their communities.

*Come join the Kiwi network that's supporting the growth of Christian leaders living & ministering in contexts of poverty & pressure across Asia-Pacific.*
